

Francisco Gonzalez

Front-End Developer

EXPERIENCE | TAILWINDCSS | REACT.JS/VUE.JS | NODE.JS

Chicksgold | independent project

JANUARY. 2023 –JANUARY. 2023

I created an attractive and functional website for a restaurant, enhancing the customer experience and increasing online reservations. I used Bootstrap to create a responsive design and JavaScript to add interactivity, allowing customers to easily and intuitively explore the menu, make reservations, and obtain information about the restaurant.

Inmobiliary | independent project

MAY. 2023 – MAY. 2023

I developed and designed an attractive and effective landing page for a real estate company, with the goal of converting visitors into clients. The page features a clear and modern structure, with sections including header, hero, features, properties, testimonials, call-to-action, and footer. I used Bootstrap and JavaScript to build the page, and ensured that it was responsive and visually appealing on different devices and screen sizes.

jrsecurity22cam | independent project

AUGUST. 2023 –AUGUST. 2023

I established an attractive and effective landing page for a camera installation company, increasing the brand's online visibility and impact. I used Bootstrap for a responsive design and JavaScript to add interactivity, creating an intuitive and effective user experience that captures visitors' attention and converts them into potential clients.

Restaurant Chinese Gril | independent project

FEBRUARY. 2024 –JANUARY. 2024

I created an attractive and functional website for a restaurant, enhancing the customer experience and increasing online reservations. I used Bootstrap to create a responsive design and JavaScript to add interactivity, allowing customers to easily and intuitively explore the menu, make reservations, and obtain information about the restaurant.
